

Safety, Health & Environmental Training

Safety Health and Environmental training address the compliance and risk areas in the business. This training equips employees to prevent incidents such as injuries on duty, illnesses and harmful environmental releases. It prepares employees to identify risk situations and hazards within the workplace environment. SHE is training which ensures that you can investigate incidents and know how to respond in emergency circumstances.

Examples of Business Training:

SHE Representative: The course is designed to equip the learner in applying safety, health and environmental protection procedures, perform inspections and describe the functions of the workplace health and safety representative. The duration of this course is five days.
